GRAYLING FIRE DEPT. RESPONDS TO HOUSE FIRE--Firemen Mac Ashworth (L) and Capt. Paul Smith wait for the smoke to clear so they can enter the building. The vacant home, on M-72 west close to Wakeley Bridge Rd., is owned by Kathleen VanSickle. The fire started in the bathroom from an electric heat tape. Burn damage was restricted to the bath and kitchen areas but the entire building suffered smoke damage.

FIRE DEPT. PREPARES TO EXTINGUISH FIRE--Firemen from the Grayling Fire Department set up their equipment in preparation to extinguish the fire in this vacant home. The fire occured on Friday, March 19 approximately nine miles east of Grayling on M-72. The Beaver Creek Township Fire Department assisted in the operation.

IRS earned income credit available to working families

By Terry Wright

child living at home, you could provide 83 costs of child care and other workrelated expenses.

families in Michigan last year. In the besides helping the individual." past, the Internal Revenue Service has automatically sent the credit to those who filed their income tax returns and who were eligible. This year, however, the payment will not be automatic. Families who qualify for the EIC are required to submit a schedule EIC along with their income tax return in order to receive their payment.

The fact that the IRS is not making

an important service to them by commissions by Governer John Engler there are two extra EIC credits, one informing them of the Earned Income through a special press release. In worth up to \$376 for families with a Credit (EIC). Offered by the federal Crawford County, Commission child born in 1992, and one worth up government, this direct payment to Chairman Dennis Long stated that, to \$451 for families that pay at least low income working families is "It's very important that the people part of the premiums for a health intended to help defray some of the here understand that they must request insurance policy that covers a child. the Earned Income Credit or they won't Families qualifying for all these credits The EIC was sent to over 350,000 locally so it helps our whole economy, much as \$2,211,

Kalkaska parents look schools to finish school year

By Terry Wright

With the closure of the Kalkaska schools on the 24th of this month, many Kalkaska parents have been scrambling to make further arrangements for their children. None of those children, however, will be coming to the Crawford AuSable School District to attend classes.

Superintendent Kent Reynolds stated two reasons why out of district students are not usually accepted at our schools. "There's no space, and if there was, we have a policy that limits conditions to accepting tuition students." He said that several Kalkaska parents had made inquiries into bringing their children here.

Commenting on the situation in Kalkaska, Reynolds said, "I hope that people identify those who are or further reduce necessary school responsible. Responsibility lies with the [state] legislature and their failure to enact a fair and equitable school finance plan. Equitable to both taxpayers and students."

Reynolds indicated that the schools in the Crawford AuSable School District are in no immediate danger of closing, but without proper state action on school finance reform, most school districts could face serious problems in the future.

With the closing in Kalkaska, a state precedent was set that may be followed in more Michigan school districts. Voters turned down three successive millage proposals in Kalkaska, forcing school officials to close down rather than attempt to operate with a deficit

functions.

The conditions which would allow for out of district students to attend schools in our district include: (1) a student who resides in another school district, temporarily, while housing is being constructed locally; (2) children of employees who don't live in the district; (3) if a neighboring district requests that a student transfer. The latter condition is usually done for ease of school transportation. Reynolds stated that employees are not required to live in the school district, though most do. He said that in an effort to always hire the most qualified personnel, sometimes those people are long time, fully established residents of neighboring counties.

Will you be ready for a tornado?

By Terry Wright

brings the threat of tornadoes to Michigan and Crawford County. Since 1950, there have been five confirmed tornado touchdowns in Crawford County. Luckily, there have been no

deaths, but statewide since 1950, 237 The approaching warm weather persons have lost their lives to a first aid kit, flashlight, and portable tornadoes.

Kmart Store Walkers

TO: Grayling Area Residents FROM: Paul Lokai - Kmart

Some of our customers have asked if they could bring their walking shoes into our Grayling Kmart store before the store opens and get some exercise. We think it's a great idea!

Any Grayling area resident wishing to get fit walking our aisles should stop in between 7:00 am and 8:15 am Monday through Saturday.

Because those hours are a busy time for us stocking shelves and cleaning up - you will need to use some extra caution and you may need to dodge boxes on the floor and stock carts on the move. But if you're willing to put up with our "early morning obstacle course" in exchange for some good exercise, we're happy to have you with us.

The only things you need to do are: 1) sign this form and drop off at the Grayling Kmart and 2) show up!

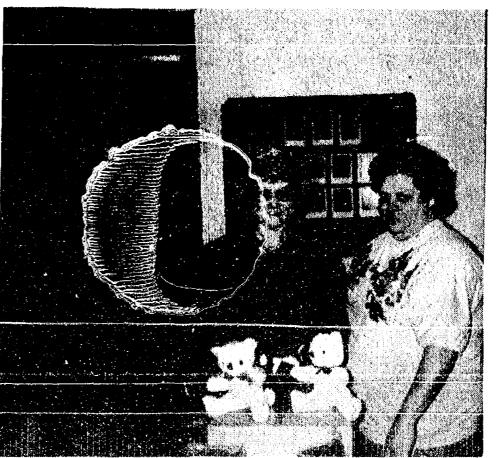

TO: Paul Lokai Kmart

Grayling, Michigan

Yes, I would like to participate in the early morning walks through your store anytime between 7:00 am and 8:15 am Monday through Saturday, /I do understand that because the store is not open for business/during those times and because there may be hazardous conditions I wouldn't normally find in the store, I will use the store aisles at my own risk and I will not hold Kmart Corporation liable if I am injured while participating in an early morning walk.

Mom says child showed respect to fellow hunter

This is going to be short and to the point in response to Ms. Moore's letter. I am very proud to say that I have raised four children, three sons (Kevin,

Michael, and Todd) and one daughter (Amy Wakeley Kolka). They were born and raised in Grayling, attended school and

graduated here, all of them work within the community, and have made their homes here.

All four children were instilled with the values of honesty, respect, and standing up for their rights.

I find it very upsetting when someone accuses my daughter of not respecting her elders. Here is a fact that I know is true. Amy Wakeley Kolkadoes respect her elders, but only if those elders deserve her respect.

A fact that I think people should be made aware of is that Amy shone her light on the boardwalk at the Millpond for you, Ms. Moore, so that you could continue to walk safely on. In my book that is what you call respect for your elders. Also, when your son went to get a metal detector, you were left standing there by yourself, and without a car or a light. Amy's husband suggested that they leave and Amy's reply was, "No, we better wait until her son gets back so she won't (Ms. Moore) be left here alone." (Not knowing when the other hunters would leave.) No respect, huh, you give me a break! Anyone who knows Amy, knows what kind of person she is and knows what the real facts are.

A very proud mother, Sharon Wakeley Grayling

Let's Talk About It

By Joe Murphy

NEW ENERGY TAX?

The old man is sitting on pins and needles awaiting spring and those events that will herald its arrival. That old horse trader blood in my veins wants to get out there and do some dealing. Though I do not deal in horses anymore, I have to be out mare which he dealt off to dad. there trying to make a deal on something to be happy. My dad and both grandfathers were known to warmer, a horse that might start all deal in horses so I come by it right but soon decided to go back to naturally. Gun shows, yard and the barn, and in spite of spurs and garage sales have to satisfy my trading and dealing instincts today. The first time I rode her she went for I do not think my neighbors would my back yard.

twelve year old's mouth look like a after that. five year old. In those hollows above a horse's eyes that grow deeper as a horse ages they would pump air with would cure a horse of a bad habit. A a basketball pump to make them horse might develop the habit of look younger. Those tricks would not fool a wiley old horse trader but which is very dangerous for the rider. they were good enough to fool the I found the best way to stop that was casual horse buyer. A lot of folks to put a quart or so of warm water in were surprised that spirited young a paper bag and climb on. As soon horse they put in the barn last night as it started to rear, I broke that was an old nag the next morning.

dad. They had an agreement that a lot of horses that way. they could lie all they wanted while funny how that horse they had turned into a balking, no-good nag broughtoverabeautiful grey Arabian about balking.

After the deal was made he told us that she was what we called a barn whip would not go another step. about a quarter of a mile and decided appreciate my having a horse barn in she was going back to the barn. I knew she had been through the mill In the old days there used to be as far as punishment went, so I tried Gypsy horse traders who the wise something different. I just would man soon learned to stay clear of, for not let her go back to the barn and they knew all the tricks of making an talked to her quietly. After about old horse look young. They could five minutes of that she gave up and file a horse's teeth down to make a I never had any problems with her

Many times just simple tricks rearing and going over backwards paper bag on its head. I don't know I used to get a big kick out of the if the horse thought that the warm deals between Bill Latter and my water was blood or what, but I cured

Another trick that worked with a dealing, but once the deal was made, balky horse was to fasten a split shot they had to tell the truth. It was on a little piece of string and tie it to the top of the bridle. When you bragged up so much a few minutes noticed signs that it was about to balk, drop that split shot in its ear. as soon as they shook hands on the That gave him something else to deal. I recall one time when Bill think about and he would forget

Notes From The Woods

By Nancy Lemmen

facilities.

In some ways, it was difficult to move away from Alma in the summer of 1976. For the previous three years, we had lived on or near the Alma College campus, where we had enjoyed the perks that being employed by the college afforded us - from plays, concerts and speakers to no-tuition classes and free use of the physical education

And so, when we found ourselves - by choice - in a small town in northern Michigan, we nevertheless wondered how to fill the gaps left when we moved from Alma,

For the most part, we need not have worried. Fun and learning when not readily available - can be created most anywhere by people who put their minds to it. And one of the most rewarding ways we have continued our education is through our local book club.

This month, we club members celebrated our tenth anniversary together with a dinner meeting and a discussion of The Mezzanine by Nicholson Baker.

Dave and I can take no credit for book club. We were not members at its inception, in March of 1983, when the founding members discussed The Comedians by Graham Greene and All the King's Men by Robert Penn Warren. We were asked to join the following month, when we discussed The Shadow Box by Michael Cristofer, a play about three families coming to terms with terminal cancer in a hospice setting. That same spring, The Shadow Box was presented at Kirtland Community College, and

Thirty Thousand 1993 **Crawford County** Visitors' Guides

Will Be Distributed

If you want to reach the people who are interested in visiting Crawford County, you'll want your business included in this year's Visitors' Guide.

Your name, products and services will be distributed to 13 Michigan Travel & Information Centers throughout the state, strategically targeted at those people interested in our area.

You'll also reach the National Guard and their families at Camp Grayling.

The Grayling Area Visitors' Council, local tourist businesses and the Chamber of Commerce will also carry this guide listing area service and emergency information, maps, places to go and things to see, lodging, restaurants, gift shops, food stores, public facilities and everything else a visitor needs to know.

To Have Your Business included, Call 348-6811 Before April 16th

And When A Visitor Asks You, "What is there to do in Crawford County?" You can give them a copy of the...

> CRAWFORD COUNTY **VISITORS' GUIDE**

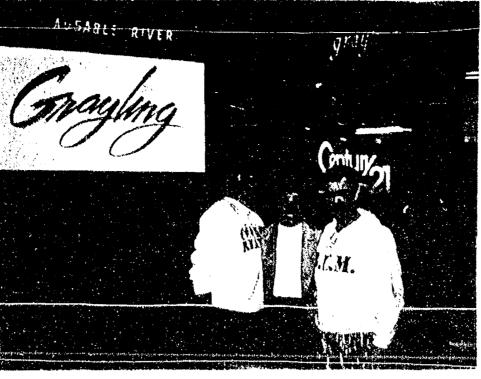

Planning has begun for fall of '93. If your child will be 5 yrs. old on or before Dec. 1st, please fill out a Kindergarten class survey.

These forms may be obtained at local pre-schools, day care centers & elementary schools. Please return to Grayling Elementary or Frederic Elementary by Wed., April 14.

> **Kindergarten Carnival Coming Soon!** 6:30 pm - 7:30 pm **Grayling Elementary, April 26** Frederic Elementary, April 27

GRAYLING WINS EXPOSURE--Debbie Bondar, right, of Century 21 River Country Real Estate, presented this Old Towne Canoe to Bart Harper of Monroe, the winner of a giveaway contest held at the Outdoorama at the Novi Expo Center. About 100,000 persons visited the show during the ten days and thousands visited the Grayling Century 21 booth and obtained information about Grayling. The canoe was given away by Century 21 River Country Real Estate and the Grayling Area Visitors Council.

DA YOOPERS PROMOTE GRAYLING--Jerry Coffey, left and Jim Coffey, right, well known as "Da Yoopers," helped Debbie Bondar select the winning entry for an Old Towne Canoe given away at the Novi Outdoorama. About 1,000 persons were in the audience during Da Yoopers show when they drew the winner's name. Da Yoopers will be in Grayling this August in a show hosted by the Grayling Lionesses.

4-H Great Lakes Camp open to county youth

Teen (ages 13-15) with a special forests, and handle wildlife. Specialists interest in the Great Lakes, science or from Michigan State University, Sea natural resources careers or the Grant Extension staff, and volunteers outdoors are invited to attend the 1993 4-H Great Lakes and Natural to help kids learn more about the Resources Camp. This camp is environment, outdoor recreation, and scheduled for July 18-24, at the possible careers. The camp is specially Ocqueoc Outdoor Center, near Rogers designed to develop leadership skills. Continued from page 1 City, Michigan.

Huron, snorkel on local rivers, explore the largest waterfalls in Michigan's lower peninsula, learn about scuba diving, enjoy beach-combing and along coasts and dunes, hike through 348-2841, ext. 264.

collapse. •Use only approved or chlorinated

supplies of drinking water.

 Check food supplies. Some food may contain particles of glass or debris.

County parks

Continued from page 1

Currently the Grayling Recreation Authority manages all aspects of recreation at Hanson Hills. Dan Wyers, the director of the G.R.A., is a certified recreational planner. Smock's wish is to incorporate any other recreational entity that wishes to be part of a unified program, into a county parks and recreation department, utilizing the G.R.A. as a base to work from. The G.R.A. would then hold the responsibility for planning, organizing and implementing recreation programs. It would alleviate the need for separate planning organizations for each program.

Verse or Worse

By Joe Murphy

What is Government

Loften times sit for hours pondering The predicament our country is in today And wonder how we could have been so stupid As to let things get that way

The figures of our national debt are beyond comprehension Our politicians speak of billions like it was small change That so many leave office as millionaires No one is supposed to think of as strange

To steal the goose from the green is a crime To steal the green is good business sense The lunch in the working man's lunch box he pays for While the politician dines at the taxpayers' expense

They can't choose between nice and necessary The way that the rest of us do each day it would be real nice to have a brand new Cadillac But we have to settle for a used Chevrolet

Now they tell us we must sacrifice To get out of the mess they got us in But they are full of big plans we can't afford For our pocketbooks are mighty slim

Why do we continue to let them do it to us Why do so many folks fail to vote Why do polificians try to be all things to all people instead of working to keep this country afloat

I'm sure the framers of our Constitution Did not foresee the mess we're in Maybe It's time to get rid of the politicians And get in some statesmen once again

Pet Care Tip

FELINE FACT. A contented cat has upright ears and relaxed whiskers. When angry, a cat moves its ears back and pushes its whiskers forward. A frightened cat lays its ears and whiskers flat.

The Bible Speaks

From The **Calvary Baptist Church**

Sin Taxes?

God gave government a right to collect taxes from citizens for the operation of government. (Romans 13:1-7). The recent discussion in Washington about more "sin taxes" on alcohol and tobacco raises interesting questions. Some liberals have challenged our use of the term "sin sickness" to describe alcoholism. Why are these same people now strangely silent about the government taxing their "sickness" as a sin?

health care system. Then, what about health care costs which come from sex related illness? Doesn't each AIDS place sin taxes on fornication and sodomy? For example, instead of using sin? tax dollars to purchase free condoms for distribution in government schools, power to control and destroy. While

why not place a sin tax on condoms? What about a sin tax on pornography to help prevent sexual abuse? Is the government unjust in placing a sin tax on alcohol and tobacco while defending sodomy as a lifestyle with special exemptions and rights? If the abuse of sex brings sickness and death just as surely as the abuse of alcohol and tobacco, why not educate against abuse by stressing abstinence toward all three in the public schools?

stop? Will high cholesterol foods be Some would excuse this "sin tax" as targeted to help prevent coronary heart just a pragmatic plan to tax people in disease? To protect the sensitive in proportion to the costs their own San Francisco, the wearing of perfume abusive behavior brings upon the in public meetings has been banned. Since sanitation is one key to good the largest increase in behavior related health, will the government someday pass a sin tax on some body odors? With government claiming authority case cost the system approximately on sin, will they impose a sin tax on \$200,000? So why not find ways to churches who are not politically correct for disagreeing with their approach to

Remember, the power to tax is the

government taxation is a divine right, it carries a responsibility before God for truth, justice and equality. Some might suggest a sin tax on congressmen who pass unfair tax laws or those who promote deficit spending? How about a sin tax on lies and broken campaign

Why not enforce a sin tax on public 1993, 7 lbs., 7 ozs. profanity and blasphemy against God? All "sin" is primarily against God and is identified by a breaking of God's If imposed, where will sin taxes divine laws or moral principles. "The 1993, 8 lbs., 4 ozs. wise [men] are ashamed, they are dismayed and taken: lo, they have of Roscommon: Samantha Rene, Grayling: Cody Daniel, March 7, rejected the word of the LORD; and what wisdom [is] in them?" (Jer. 8:9). Pastor "B"

Important Notice Relative To **Delinquent Taxes**

Because the list of Delinquent tax lands for tax sale advertising must necessarily be made up several months ahead of time in order to get it in the printer's hands, several descriptions are included in the Crawford County list on which taxes have been paid.

IF YOUR 1990 AND PRIOR YEARS TAXES HAVE BEEN PAID, YOUR LAND CANNOT BE SOLD IN THE MAY 4, 1993, TAX SALE.

If you have not paid your taxes and your land is listed for sale, you must pay at any time up until Monday, May 3, 1993.

We shall be glad to answer any other questions you may have about the tax sale here at the Treasurer's Office.

Joseph V. Wakeley Crawford County Treasurer

Jerry W. Morford Manager - Clerk

-19-26

Case 93-1: G.T. Planning Commission, Petitioner Location: Entire Recreational Forest (R-F) and Residential (R-2) Zones of Grayling Township.

A request to amend Grayling Township Zoning Ordinance 92-2 Sec. 20.1-0. Add the following to specify criteria for Multi-Family Dwellings. In the zones in which Multi-Family Dwellings are permitted the following square footage requirements shall apply.

- A one bedroom Multi-Family Dwelling Unit shall have a minimum total square foot floor area of 576 square feet.
- A two bedroom Multi-Family Dwelling Unit shall have a minimum total square foot floor area of 720 square feet. A three or more bedroom Multi-Family Dwelling Unit shall
- have a minimum total square foot floor area in compliance with current Single Family Dwelling square foot requirements.

Current zoning requirements, maps and Ordinances may be viewed at the Grayling Township Office during regular business hours.

Correspondence concerning the request may be directed to: Grayling Township, P.O. Box 521, Grayling, MI, 49738. Phone: (517) 348-4361.

> Monica S. Ashton, C.M.C. Grayling Township Clerk

GRAYLING TOWNSHIP NOTICE

The Grayling Township Planning Commission will hold a public hearing on Monday, April 5, 1993, beginning at 7 pm, in the Conference Room of the Grayling Township Hall, 2090 Viking Way (M-72W), to receive and review public comment regarding the following cases:

Case #93-2C:

Forts & Flags Adventures, petitioners. Property Code: 20-041-004-020-00. Located on South Redhead Lane off North Down River Road in Section 1, T26N, R3W. 40 acre parcel.

A request for a Conditional Use Permit to allow a three field recreational facility and target range to play splat ball with tourist orientation.

Case #93-1NA:

Stephan & Terri Shaw, petitioners. Property Code: 20-040-014-002-060-00. Located on Wakeley Bridge Road in Section 14. T26N, R2W.

Zoning Ordinance and Case Files are available for inspection at the Grayling Township Offices during regular business hours.

Correspondence concerning the cases should be directed to: Grayling Township, P.O. Box 521, Grayling, MI 49738. (517) 348-4361.

> Monica S. Ashton, C.M.C. Grayling Township Clerk -25

NOTICE **COUNTY OF CRAWFORD CLEAN AIR ORDINANCE**

Effective Upon Publication

To protect and enhance indoor air quality and contribute to the health and well-being of all employees and the public, Crawford County enacted a smoke-free policy effective December 1, 1992, and distributed said policy to all County Departments. Effective March 25, 1993, said policy is enacted as County Ordinance 93-1, including the following provisions.

SMOKING IS PROHIBITED IN ANY LOCATION OF COUNTY OWNED BUILDINGS AT ANY TIME. THIS ORDINANCE APPLIES TO ALL EMPLOYEES, CLIENTS, CONTRACTORS AND THE GENERAL PUBLIC.

The success of this ordinance will depend upon the thoughtfulness, consideration and cooperation of smokers and nonsmokers. All employees share the responsibility for adhering to and enforcing the ordinance.

NOTICE AND POSTING The smoking prohibition section of this ordinance shall be posted by the Crawford County Clerk-Register at all public entrances to all buildings owned or leased by Crawford County. All employees of Crawford County shall receive notice through postings in individual offices. The absence of a posting shall not bar enforcement of this ordinance. Also, prominent signage shall be displayed

at all entrances to buildings. **ENFORCEMENT OF POLICY**

All complaints concerning alleged or confirmed violations of this ordinance shall be reported in writing to the County Health Officer with a copy submitted to the Chairperson of the Crawford County Board of Commissioners. investigation of Compisints

All complaints received by the Health Officer will be investigated within 10 working days of receipt of the written request. The results of the investigation will be in written form filed with all parties concerned in addition to the County Administrator.

Violations

If, following investigation, a violation of this ordinance is determined to exist then a written warning will be issued by the investigation officer for a first time offense. A second violation will be subject to a \$50 fine. A third violation will be subject to a \$200 fine.

ORDINANCE REVIEW COMMITTEE

The Crawford County Board of Commissioners shall appoint a Clean Air Ordinance Review Committee which shall meet no less than quarterly in each calendar year. The Committee shall review the Clean Air Ordinance, evaluate the program and offer guidance to the Board of Commissioners on enforcement concerns and other issues as they may occur. The Committee shall consist of at least five members, no less than two of which shall be members of the Crawford County Board of Commissioners. Initially, membership on this committee will be comprised of the following persons, however, the Committee structure may be changed by the Crawford County Board of Commissioners without further amendment to this ordinance:

County Commissioners - 2 County Health Officer County Clerk

County Sheriff or Undersheriff In addition, a representative Officer or Administrator of each building or department shall serve as a temporary Committee member when a review process or investigation affects their respective department or building.

REPEAL OR AMENDMENT OF INCONSISTENT ACTS Any motion, resolution, ordinance or other act of the Crawford County Board of Commissioners in conflict with the terms or provisions of this ordinance is hereby rescinded or amended in whole or in part to conform to this ordinance.

INTERPRETATION AND SEVERABILITY This ordinance shall be interpreted in a manner consistent with all applicable state and federal laws and regulations. It is recognized and intended, however, that this ordinance's smoking prohibition will be more strict than the minimum provisions contained in state and federal laws and regulations. Should any sections, paragraph, or sentence of this ordinance be held invalid for any reason, such holding shall not be construed as affecting the validity of any remaining portion of this ordinance.

Dated: 3-10-93 I. Elizabeth H. Wieland, Crawford County Clerk and Clerk of the Crawford County Board of Commissioners, do hereby certify this to be a true and exact copy for the minutes of the Crawford County Board of Commissioners on March 25, 1993.

> Elizabeth H. Wieland. County Clerks

NOTICE BY PERSONS Notice of **CLAIMING TITLE** UNDER TAX DEED

To the Owner or Owners of any and all Interests in, or Liens upon the Lands herein described:

Take Notice: Sale was lawfully made of the following described land for unpaid taxes on that land, and that the undersigned has title to the land under tax deed or deeds issued for the land. You are entitled to a reconveyance of this land within 6 months after return of service of this notice, upon payment to the undersigned or to the treasurer of the county in which the land is situated, of all sums paid for the tax sale purchase, together with 50% in addition, and the fees of the sheriff for the service or cost of publication of this notice. The service or publication costs shall be the same as if for personal service of a summons upon commencement of an action, together with a sum of \$5,00 for each description, without other additional cost or charge. If payment as described in this notice is not made, the undersigned will institute proceedings for possession of the land.

Description of land: State of Michigan, County of Crawford, Section 8, Town 26 North, Range 4 West, Block 14, Let 25, 26, 27, 28, Township of Grayling, Portage Heights, # 20-045-760-014-025-00.

Amount paid: \$84.89 Tax for the year 1988

Amount necessary to redeem, \$127.33 plus the fees of the Sheriff.

(Signed) Jon Eric Griesmer, 3632 Winding Pine Dr., Metamora, MI, 48455.

To: Edward L. Baugh, his unknown, unascertained, undetermined, unborn heirs, devisces, legatees, and assigns, including those who are legally incompetent to act in their own behalf, 25331 Sheowassee Cr., #105, Southfield, MI, 48034, said Edward L. Baugh being last grantee in the regular chain of title of such lands or of any interest therein as appearing by the records in the office of the Register of Deeds of said County.

Notice of Mortgage Foreclosure Sale

Default having been made in the conditions of a certain mortgage made July 24, 1975, by Russell J. & Faye Owen, husband and wife, as mortgagor(s), to the United States of America, as mortgagee, and recorded on July 24, 1975, in the Office of the Register of Deeds for Crawford County, Michigan, in Liber 146 of mortgages on pages 311-314;

On which mortgage there is claimed to be due and unpaid at the date of this Notice Twenty-190-116 two Thousand Five Hundred Forty-six and 63/ 100 Dollars (\$22,546.63) principal and Six Hundred Forty-six and 70/100 Dollars (\$646.70)

no suit or proceeding at law or in equity having been instituted to recover the debt or any part of the debt secured by said mortgage, and the power of sale contained in said mortgage having become operative by reason of such default;

NOW, THEREFORE, Notice is Hereby Given that on April 29, 1993, at 10:00 o'clock in the forenoon at the Front steps (east side) of Courthouse in Grayling, Michigan, that being the place for holding the Circuit Court for the County of Crawford, there will be offered for sale and sold to the highest bidder, at public sale, for the purpose of satisfying the amounts due and unpaid upon said mortgage, together with the legal costs and charges of sale provided by law and in said mortgage, the lands and premises in said mortgage mentioned and described, as follows, to wit:

Let #22, Block 2, KAREN WOODS SUBDIVISION, according to the Plat thereof, as recorded in Liber 1 of Plats, Page 44, Crawford County Records,, Grayling Township, Crawford County, Michigan.

The redemption period will be six months from the foreclosure sale. Property may be redeemed by paying the amount of the bid at the foreclosure sale, plus interest and any unpaid encumbrances on the property from date of sale. For additional information, contact UNITED STATESOF AMERICA acting through Farmers Home Administration, 377 S. Mt. Tom Rd., Mio, MI, 48647, mortgagee. Dated: March 17, 1993

GMS wrestlers grab 10 first place medals

The Grayling Middle School "It was a pretty intense tournament," Registration is \$20 a child with a wrestling team brought home 20 said Coach Bill Bedford. "There was

their efforts."

In the 5th-6th grade category, Eli Tobin (75 pounds) placed 1st; Brian Powell (75 pounds), 3rd; Rocky DeVries (93 pounds), 2nd; Neal Jozsa (121 pounds), 1st; and Brandon Hoggard (128 pounds), 1st.

Winners in the 7th-8th grade category were Chris Ramsey (65 pounds), 1st; Dana Beckwith (75), 1st; Andy Radzwion (92 pounds), 3rd; Damon Morgan (95 pounds), 1st (bracket A); Roger Robbins (96 pounds), 1st (bracket B); Monte Malonen (122 pounds), 2nd; Josh Taylor (123 pounds), 1st; Danny Ray (123 pounds), 2nd; Joe Medeiros (130 pounds), 1st; Andy VanGuilder (130 pounds), 2nd; Jason Hall (134 pounds), 1st; Adam Galvani (138 pounds), 3rd; Brian Dietz (138 pounds), 2nd; Joe Woidan (144 pounds), 3rd; and William Miller (160 pounds), 2nd.

The GMS wrestlers will compete in their final tournament at Standish on Saturday, March 27.

K of C plan annual Tootsie Roll fundraiser

The 18th Annual Fund Drive to assist the mentally retarded locally and throughout Michigan will be conducted by Council 1982 of the Knights of Columbus on April 2 and 3. Phillip Savoie, council grand knight announced.

Last year, statewide, the Knights of Columbus, a Catholic men's fraternal society, collected \$1,251,266.07 in the three-day weekend drive. Locally, \$2,267.24 was collected and contributed to R.O.O.C.—Special Olympics.

Under the program, which is carried out in most of the 300 Knights of Columbus Councils in Michigan, people are asked to make a financial contribution to assist persons having mental disabilities and are given a Tootsie Roll candy in appreciation of their gift.

Cards of thanks

The Grayling High School ski team would like to thank a few Grayling area businesses and people for their support this season.

Thank you McDonalds for the cups they gave, and offered orange drink. Thank you to Glen's Markets for giving us bags of potato chips. A special thanks to Subway for the good deal we were given on sub-sandwiches. A very big thanks to Dennis Ormsbee who let us use a very big thermos for hot chocolate. It kept us warm. We want to thank everyone who came to our meets and cheered us on. We had a fun season.

> Thank you. The Grayling High School ski team

Cards of thanks

Words cannot express our thankfulness to have our daughter back home with us.

We thank God she is alive and was unharmed. We also thank our church, Life Tabernacle for prayers and help, family and friends, truckers. The police departments and Mr. Dean Goss, the radio and TV networks for the time and effort you made, and Kathy at Lone Pine Motel in Clare, Michigan. Many thanks, you've got a big heart.

We especially want to thank Jim Hall from St. Louis, Michigan. If it was not for your help, our daughter may not be with us today. We thank God today for people like you who are concerned enough to get involved.

John and Ann Ockerman

vou we ever seen

The new Bonus Lotto!

It's an all new game with bigger jackpots and a bonus ball that gives you more chances to win than ever before!

More money than ever before!

Bonus Lotto starts with a guaranteed \$4 million jackpot – and rolls over by \$4 million every time!

More chances to win!

Players win the Grand Prize by matching the 6 numbers drawn from 47. BUT, if you don't match all six, there are still more chances to win. Because a 7th ball is then drawn - called the Bonus Ball. The Bonus Ball gives players even more chances to win more cash prizes. Here's how:

Match all 6 numbers drawn and you win the Jackpot!

B+BBBB

Match 5 of the 6 numbers drawn plus the bonus ball and you win \$50,000!

Match 4 of the 6 numbers drawn plus the bonus ball and you win \$1,000!

Match 3 of the 6 numbers drawn plus the bonus ball and you win \$100!

Match 2 of the 6 numbers drawn plus the bonus ball and you win \$4.

\$2 is all it takes!

Each Bonus Lotto wager costs \$2.00 and is valid for the next Lotto drawing unless multiple drawings are selected. If multiple draws are played, a player can play up to 20 consecutive draws.

One drawing, once a week!

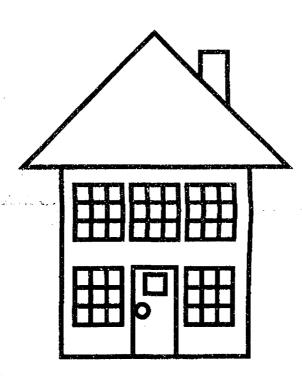

Bonus Lotto drawings are now held just once a week - every Saturday at 7:30 p.m. on the Megabucks television show. Check your local television listings for the television station in your area.

See your Lottery retailer for details today!

Odds of winning: 6 of 6: 1 in 10.737,573; 5 of 6 + Bonus Ball: 1 in 1,789,595; 4 of 6 + Bonus Ball: 1 in 17,896; 3 of 6 + Bonus Ball: 1 in 688; 2 of 6 + Bonus Ball: 1 in 72. Overall odds: 1 in 65. Bonus Lotto is from the Michigan Lottery.

You have to be shrewd when remodeling

By Thomas Baese, president of Tri-Lakes Home Builders Association

Buying or remodeling a home today costs a lot of your hard earned money. You should be especially careful before you sign a contract or pay any money. If you buy a \$30 toaster and it doesn't work, your life will not be disrupted. But problems with a \$100,000 house or a \$10,000 remodeling job can be emotionally and financially draining. Here are some helpful hints to make you a shrewd consumer.

One of the most important precautions is: Get everything in writing. A new home or remodeling job is a business transaction. No matter how friendly the people with whom having everything in writing, will be employed. Committing everything to writing will the parties involved.

opportunities for the message to be suspicious about why the fourth is so is a member. Membership in a home specific contractors. garbled or forgotten before it is transmitted to the person who will actually install the carpet. If the wrong carpeting is installed, there will be no record that you made a different request.

Another important rule is: The lowest bid is not always the best bid. With a new home or a remodeling job, lower bid could mean that lesser

Choosing the right carpet takes knowledge

If you've been shopping for carpet lately, you know all too well that the carpet buying process isn't easy. Faced with a seemingly endless selection of colors, fibers and carpet styles, many find the carpet buying process confusing and time consuming. It doesn't have to be!

A little knowledge about carpeting, before you buy, can make a big difference in avoiding costly mistakes and selecting the carpet that best meets your needs and expectations.

Good carpet must not only last a long time, but appearance retention, style, color coordination, comfort and easy maintenance are all listed as important factors in carpet performance, according to a recent consumer survey conducted by Peerless Carpet Corporation, one of the world's largest carpet manufacturers.

"Today's consumers expect that carpeting will last. They are looking for a carpet that will look new years from now; one that will be comfortable and fashionable and easily maintained," says Peerless' Corporate each fiber type offer advantages over Marketing and Advertising Director others depending upon where the car-Catherine Larose.

"Today's carpet consumers are every bit as discriminating as fashion conscious clothing shoppers, and they'd better be," warns Larose. "They'll have to live with their carpet a lot longer than their clothing." In fact, with today's advanced manufacturing processes and space age fibers, the family usually tires of the carpeting long before it wears out.

A consumer has to be well informed to avoid choosing the wrong type of carpeting for a room. A number of decisions should be made before going shopping.

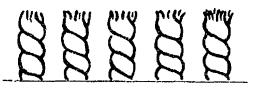

Topping the list is the specific application for the carpet. Different uses require different characteristics. For example, a soft luxurious feel is highly desirable in the bedroom, and durability and easy maintenance are crucial factors for the family room, hallways and basement. Various combinations are needed for living and dining rooms depending on the traffic patterns in each room. After deciding on the carpet's application, a consumer should examine specific carpet

Pile density is the most important of these three. It refers to the space between individual tufts or loops of yarn[.] that make up the carpet pile. Dense carpet packs more fiber into the backing. A dense pile wears longer, resists crushing and matting better and retains its texture longer.

HIGH DENSITY

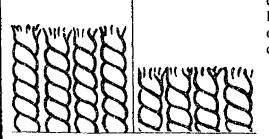

LOW DENSITY

Closely packed pile helps resist stains and dirt by keeping them on the surface of the carpet where they can be easily removed.

HIGH PILE

LOW PILE

Pile height is also an important gauge of carpet quality. In carpets of equal density, the one with lower pile will generally perform better.

With most cut pile constructions, wist level and twist stability are also important considerations.

qualities.

With two basic types of construction, four main fiber types, and seven different style types, a consumer faces 56 choices before quality, comfort and color even enter the purchase equation. Add pile height and density, twist and backing and you have a computersized calculation to make before considering which color would best match the burgundy polka dots on the wallpaper in little Melissa's bedroom.

Actually, a consumer who understands the basics of carpet fibers and manufacturing techniques is well prepared to choose carpet that will perform best for his or her specific needs.

Carpet Fibers Make A Difference

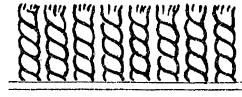

Fiber choice is important and should be based upon intended use, appearance and cost. Carpet yarn or fiber includes nylon, polyester, polypropylene and wool and can either be tufted or woven. The differing properties of pet will be used.

Most carpets on the market today are made from synthetic fibers. Nylon has excellent durability, abrasion resistance and is very resilient. Polyester has natural stain and static resistance. Polypropylene is light fast and resists moisture.

Stain and soil resistance along with color clarity are essentially functions of the carpet fiber. Good carpets will carry a label on the backing which should be checked for stain and soil resistance and warranty protection against wear and static. If no such label is present or the warranty is inadequate, beware of the carpet's perfor-

Manufacturing Techniques Are Kev Factors

Fiber is only one consideration in carpet selection. Construction, or how well the fiber is put together with the backing, is the difference between good and poor quality carpet. This difference is measured in pile density, pile height and twist levels.

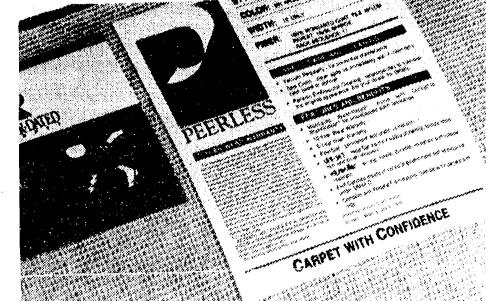

Carpet yarn is formed by twisting two or more yarn strands together before tufting. The tighter the twist the better a cut pile carpet will perform.

A close look at individual tufts of yarn should reveal neat, tight and well defined tips of individual yarn. If they are loose and flared rather than tight and neat throughout, then the carpet will likely not perform well.

Perhaps the most important factor in cut pile constructions is heat setting. Heat setting gives the yarn a twist memory to stabilize it, which results in longer wear and better performance. Make sure the twist has been heat set before buying the carpet.

Although the choices are many, you can select carpet that will provide long-term satisfaction. For a free copy of the Consumer's Guide to Carpet call 1-800-845-4252.

Check the carpet's label. It can provide a lot of useful information about the quality of the carpet.

Carpet style suggestions for each room in your home

Knowing what you want or need before entering the carpet showroom can simplify your purchase process. A careful analysis of the type of conditions to which the carpet will be subjected is fundamental.

Do you want a luxurious carpet that you can sink your toes into? Or do you need a carpet that can survive an active family and withstand lots of wear and tear? Knowing the traffic patterns in various areas of the home will help complete your analysis.

Halls and Stairs: These high traffic areas should be covered with a densely tufted carpet with low pile. Color should be neutral and the carpet should possess good soil hiding propDining Room: Stain and soil resis-

tance are high priorities here. Living Room: If the living room is used a great deal by the family, look for a carpet with the same characteristics as the dining room. Otherwise go for luxury and comfort.

Master Bedroom: This is a low traffic area where your imagination can run free. Look for color and comfort. Children's Room: Look for a

durable, easy to clean carpet with good soil hiding capabilities.

Family Room: A party-proof carpet is called for in this area. Dense pile, excellent soil resistance and for easy maintenance a multi-tonal carpet usually performs best in these condi-

Colors: Choosing The Right Ones

Decorating a home means creating an environment that makes you happy—one that's flexible, functional and fashionable enough to fit your family's tastes, interests and lifestyles.

When it comes to decorating, carpet serves as the foundation for any design scheme. As the "fifth wall" of a room, your floor is the common denominator that unifies all other design elements. And carpet is an investment you will live with for many years to

When selecting carpet, nothing is as important as the correct color choice. Despite the fact that some would-be carpet buyers have a color in mind before they walk into a store, selecting the right carpet color can be overwhelming.

Ultimately, the choice of color is a subjective and personal decision. And there is no single decision that will have a greater bearing on customer satisfaction. However, color selection also creates the greatest potential for error because there are so many factors involved in choosing the correct color.

To try and simplify the color selection process, Vicki Jones, a colorist for Peerless Carpet, one of the world's largest carpet manufacturers, offers some suggestions. Like the conductor is to an orchestra, or the head chef is to a fine restaurant, the eye of the colorist is a critical asset in determining the success of any carpet manufacturer.

Jones explains that color availability has undergone dramatic changes in

the past 30 years. "Carpet color selection used to be rather limited. Manufacturers, in an attempt to ensure extended carpet life, frequently used medium and darker shades and patterns to help hide dirt. With advanced technology, better soil resistance and stain protection, carpet color choices today are virtually unlimited. In response to the demands of the fashion conscious consumer, manufacturers now introduce new color trends every six

Color Basics

There are six basic primary and secondary colors in the spectrum, and another six tertiary colors. In the color wheel shown here, the primary colors are red, yellow and blue. Secondary colors—orange, purple and green-are made from the combination of two primary colors. Tertiary colors are derived from the combination of a primary color with its neighboring secondary hue. Colors on the left of the wheel are warm, while those on the right are cool.

Jones says, "these colors can be effectively combined in any one of three creative color schemes. A complementary scheme, for example beige and purple, yellow and mauve or peach and blue, results from using colors opposite each other on the color wheel. An analogous scheme employs colors that are next to each other on the color wheel, such as blue with purple and blue-green. A monochromatic color scheme is achieved by using different shades of the same color."

You can also create color schemes by borrowing from a painting, window treatment, piece of pottery or fabric in

Color Is A Great Space Saver Or Space Maker

Color affects the way we perceive space. It can create a mood or visually alter the dimensions of a room by creating a feeling of expanding or shrink-

In carpet, color is the key to transforming space. To cozy up a large room with a northern or eastern exposure, choose a dark color carpet from the warm side of the spectrum. Because deep rich hues absorb light, they give the illusion of smaller, more intimate space.

Lighter colors help to visually expand space, particularly pale pastels and neutral hues. For sunny southern and western exposures, greens and blues will help to cool the atmosphere.

Color Reflects Style

The choice of color can enhance and complement furniture styles. Traditional rooms are best suited to high quality carpet with luxurious dense pile. Styles such as saxonies, level loops or random shears in muted tones such as rose, delft blue, greengray and subdued pastels are well suited to enhance traditional furnishings. On the warmer side, the richer tones of garnet, sapphire, topaz and emerald are also compatible with traditional environments.

Country style furnishings go best with modified earth tones: chestnut, sand and gray; or alternately, the muted dusty tones of blue, rose, peach, burgundy or green.

The purity of line and practicality of design symbolic of contemporary furniture is ideally reflected in upscale colors such as warm mauve, peach, loops, tip sheared and cut/loop or coral, blue-green and a variety of traceries. creamy whites which can soften hightech furnishings. Consumers may also opt for quieting earth tones such as taupe, warm gray and variations of

For those leaning toward the eclectic blend of past and present, neutral colors such as taupe or gray draw attention to the mix of furnishings. Alternately, try deep, rich jewel tones to add life and energy to a mix-and-match

Redecorating is a costly undertaking in terms of time, energy and money. It pays to do it right the first time. Whatever your preferences in furniture and color, following these basic guidelines is bound to ensure greater satisfaction when the job is

shades of the same color.

The various types of carpet construction include velvets, saxonies or plushes, friezes (pronounced free • zays), level loops, multi-level

Velvets are the ultimate in elegance. All the pile fibers blend together in these extra dense, cut pile carpets to give you an ultra-smooth sweep of rich luxurious color. They are particularly suited to the living room, dining room and master bed-

Saxonies or plushes offer versatile beauty in cut pile. Not as formal as velvets, the degree to which individual tufts are visible in the pile creates a wide range of subtly different looks. This style shows footprints and shading as part of its styling effect. These carpets are well-suited to almost any residential application, except children's

Friezes are the most casual and rugged of cut pile carpets. Tightly twisted heat-set yarns curl back on themselves creating a distinctive nubby or pebbled texture look. They tend to wear very well and hide footprints and dust making them ideal candidates for halls and stairs, children's rooms, and living and family

phie

Level loop pile carpet is made with tufted loops of the same height. Its tight pebbly surface improves durability and hides footprints. Soil tends to stay on the surface for easy cleaning. The visibility of each loop and the way it reflects light from the surface give level loop carpets a charming appeal that blends well with any decor. It's a multi-purpose product that works well in the bathroom, kitchen, children's room, family room and hallway.

Multi-level loop carpet uses different loop heights to create a wide range of styles in a sculptured or patterned surface. The carpet design can offer additional practicality in maintenance over a level loop texture due to its patterned effect. It fits the same applications as the level loop.

Tip sheared carpets tend to be the most luxurious of the loop styles. Using loops of the same height, a rich pattern is created by shearing the tips of some loops, while others are not sheared. It's at home in halls and on stairs, as well as in the family room and children's rooms.

Cut/loop combine the effect of saxony carpet with a tracery loop patterned effect. These carpets are sometimes referred to as "traceries." This unique combination of cut pile and loop pile creates a carved, sculptured effect that enhances the master bedroom, living room and dining room.

reduce costs, homeowners may wish to consider one natural gas appliance for two separate jobs—heating water and heating air, say consumer specialists at the American Gas Association. The combo-heater system takes hot water (135 to 140 degrees F) from a

"Combo-Heater" means

hot water, warm home

regular residential gas water heater and circulates it through a closed system to a specially designed air handler. The air handler extracts heat from the water and uses it to warm air. While a fan or blower moves the warmed air (100 to 110 degrees F) through ductwork, the cooled water is returned to the water heater to be re-

In most combo-heater systems, the water loses only about 15 degrees while circulating, yet provides all the warm air that's needed.

Using one natural gas burner to do two jobs saves money because natural gas is the most economical home energy source, according to an analysis by the Department of Energy.

The combo-heater system also has other advantages, A.G.A. officials say, including low first cost and high efficiency. In addition, the combo-

Importance of inspecting house before you purchase can't be overlooked

The Most Commonly Asked **Questions And Answers**

The real estate market has toned down dramatically since the giddy selling days of the 80's, yet these days there are clear signs of renewed home buyer activity. Home inspectors around the country have reported a significant pick-up in pre-purchase inspections, according to the American Society of Home Inspectors, (ASHI, the nation's leading professional organization of independent home inspectors. And with morigage rates at affordable lows, the expectation is that we are headed for a busy home buying

What Are Today's Home Buyers Most Interested In Knowing About Their Prospective Purchase? Size. style, and location are always the primary issues, but buyers today are placing an increasing emphasis on learning about the condition of the home and the financial impact that it

"It's probably a combination of the recession and heightened consumer awareness," says ASHI spokesman. Jules Falcone of Philadelphia, "but 99% of the time what the buyers want is an assurance that the various systems and components of the house are functioning as they should be. It's not like it was years ago, when you could count on soaring equity to cover the cost of any repair or improvement expenses. Today every dollar has to be accounted for.'

A professional pre-purchase home inspection, which tells the buyer about the physical condition of the property and which items will need a great deal of money to repair or replace, has become routine in most parts of the country. Nevertheless, there are still sections where the service is not well known.

What are the most common house problems buyers can expect to find? In existing homes, 20 years and older, the ASH1 experts say that roof shingles, electrical wiring, and water drainage systems are the items most commonly cited on inspection reports as needing repair or modification. In new construction, inspectors frequently find water seepage into the basement or cellar, inadequate attic ventilation, poor roof construction, and substandard masonry and finish

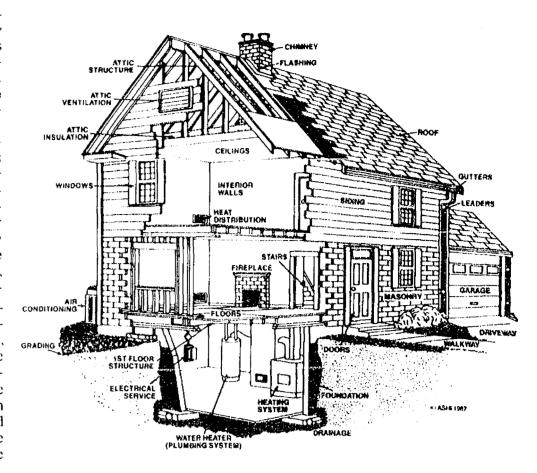

Are there any environmental hazards present in the home? In response to a growing awareness of the dangers posed by certain substances, such as radon, asbestos, and urea formaldehyde foam insulation, many consumers today are paying extra to have special tests performed to make sure their new home doesn't pose a health hazard to them and their family. Although a standard ASHI home inspection does not include environmental items, home inspectors may recommend that clients obtain further specific evaluations, and offer guidance on the use of special laboratories which perform the analysis.

What is the difference between a home inspection and an engineering inspection? Which is appropriate for the home buyer? Considerable confusion surrounds this question, particularly since in some areas, home inspections have been inadvertently referred to as engineering inspections or evaluations, and engineers sometimes perform home inspections. But the two, according to home inspection and engineering authorities, are actually quite different.

Engineering evaluations are usually specialized by discipline (such as chemical, civil, electrical), and involve scientific measurements and computations to design proper and safe systems. Home inspections, on the other hand, tell buyers what they really need to know: what condition is the house in today? The home inspection, whether it is performed by a professional engineer (P.E.) or a non-engineer inspector, does not involve engineering analysis or original design, but deals instead with the in-service operation or failure of a home's systems and components, as well as the type of maintenance that has been and should be conducted. It is based on established criteria of performance and technical training specific to the home inspection profession.

members and a copy of its pamphlet for home buyers which explains the home inspection service in greater de-

New stoves use less electricity

The new electric cooktops and ovens on the market today will make your cooking chores more enjoyable. Many choices also use electricity efficiently, and that can help you lower your electric bill. Using less electricity to do the same work also helps to delay the need for new power plants. That protects our environment and preserves our natural resources, according to the Edison Electric Institute and the National Rural Electric Cooperative Association, two national electric utility associations.

"The cooktop choices available to home owners used to be either a gas burner, or an electric one with the familiar coil-type resistance elements," said Tom Farkas, residential programs' manager at the Edison Electric Institute. "Today, you have a variety of electric cooktop options to

choose from. In addition to the familiar coil, electric cooktops now come with European-style solid disks, radiant elements underneath a smooth glass-ceramic cooking surface, and even one that heats a pan without getting the cooktop surface hot. Electric cooktops also come in a variety of modular units. Cooking with electricity is fun, clean and more energy effi-

Electric cooktops, in order of price from lowest to the highest, now feature the following cooking surfaces: The traditional Coil Cooktop, ideal as

a basic cooktop for modest budgets and everyday cooking tasks. New thermostatic controls can cycle the coils on-and-off to maintain a preset temperature.

Solid-Disk Cooktops use disks of cast iron. In addition to thermostatic controls, thermal protectors, or limiters, are available to cut off or re-

duce current flow to the element if a pot boils dry. The disks are sealed to the cooktop surface for easy cooktop cleaning.

Glass-Ceramic Cooktops enable a pan to sit right on top of a smooth glass-ceramic cooking surface. Spills wipe up easily. Designs on the cooktop indicate the heating areas. Glass-ceramic cooktops include thermostatic controls and thermal limiters as options. Some come with halogen cooking elements that offer instant-on and-off speed.

Induction Cooktops are the ultimate in cooktops. Every other cooktop must first create heat, and then transfer this heat to the food through a pot or pan. Induction cooktops cause the pan to be both the heating element and the cooking surface. This cooktop cooks with a cool surface. Induction cooktops feature instantaneous response, precise temperature control, and easy cleaning.

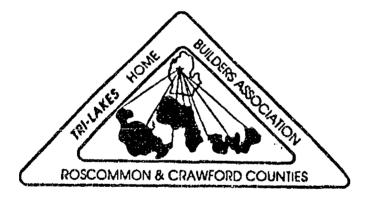

"Electric ovens have become more helpful and energy efficient too," said Farkas. The old standby, radiant oven, has an element in the bottom of the oven. Heat rises from the element and the food is cooked. To improve upon this method of heating, manufacturers have added a fan to evenly circulate the hot air around the oven.

Convection ovens cook uncovered food about 25 to 30 percent faster and produce roasts that are more tender and juicy. This oven also eliminates the need to baste foods, and now you can cook on all the oven racks without worry of one rack cooking faster than another. Combination radiant/convection ovens combine the best of both ovens.

The microwave oven is by now familiar to almost all American home owners. Besides its speed, this oven uses up to 90 percent less energy than a gas oven. Some microwave ovens include a broiling element to brown

If you can not decide which oven is best, you can choose one that combines all three cooking modes: radiant, convection, and microwave. This oven is more expensive than a standard one, but it is now available. Ask at your favorite appliance dealer.

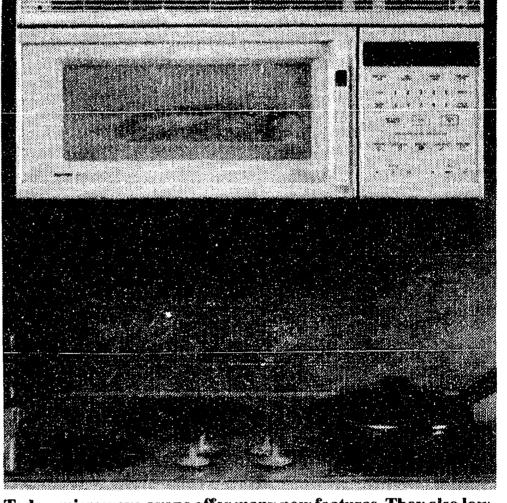

For more facts on using your new electric kitchen-as well as all your large electric appliances-more energy efficiently, call your electric utility's residential marketing department.

We Take Great Care In Offering The Best Service

Combine natural and modern cooling ideas

By Thomas Baese, president of Association

Before the advent of airconditioning, homeowners relied on nature to "keep their cool." Today we have a lot more options and can combine those generations-old "natural" cooling methods with the best modern technology has to offer.

When you are planning to build a new home you can think "cool" from the very beginning—the site selection and construction. Let trees shade your roof, walls and windows. Broadleafed trees growing to the south of the house will filter the hot, summer sun while allowing light through in the winter. Evergreens planted to the east and west will also help block scorching summer sun.

Construction techniques and exterior design can also help keep your house cool. Window treatments such as overhangs, adjustable awnings, shutters, exterior blinds, and lowemissivity glass and films are all effective shields for the sun's heat. An overhang shades the window from direct sunlight, though it will not protect east facing windows in the morning or west facing windows in the late afternoon.

Awnings, shutters, and exterior blinds work especially well on windows that face east and west. Here they help shield morning and evening sun. They're also effective on southfacing windows on warm spring and fall days when the sun drops below the protection of the overhang.

Ordinary window glass transmits ultraviolet heat rays from the sun. You can reduce this effect by applying reflective film or by instaling lowemissivity (low-E) glass. Low-E glass has an almost invisible metallic coating, either suspended between the two panes of glass on a film, or applied directly to one of the inner panes of glass. The coating reflects heat while letting light in. The same coating also helps keep wintertime heat indoors. Windows made of low-E glass may

windows.

While keeping the sun out can help you may want to also consider using than inside. This means you probably natural ventilation. Ventilation serves exhausts the heat that builds up within the house because of activities such as in a matter of minutes. A whole-house cooking, laundering, and bathing. fan won't generate a breeze strong the ceiling during the winter. Second, it creates airflow, and moving air feels cooler.

Position windows to take advantage of natural breezes and cross ventilation. This is an excellent start to bring a breath of fresh air into your home. Equally sized windows on both the windward and leeward sides allows a breeze to move through the house. Windows on the windward and adjacent sidewalls create a suction which pulls air through the sidewall

Consider the types of windows you select too. Fully opened double-hung, single-hung, and sliding windows are really only half open because their sashes block half the potential airflow. Casement and awning windows on the other hand, provide more ventilation per square foot, because nearly 100 percent of their area is available for airflow when the window is fully

Casement windows have another feature going for them; open one and it enables you to catch breezes moving parallel to the window. This is called a"wing wall" effect. It creates negative pressure which pulls air out of an enclosed space, while another open window creates a positive pressure, pushing air in.

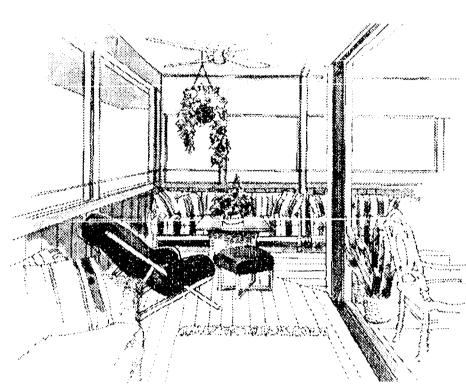

Natural ventilation may need a boost sometimes. A whole-house fan can be located in the attic or a hallway ceiling. It pulls large volumes of air in through open windows on the lower levels and exhausts it through attic ventilators. To size a whole-house fan, compute the total volume of your home—floor area times the ceiling heights — and multiply by .33. Choose a fan that has

Tri-Lakes Home Builders conventional glass double-pane that is equal to or greater than this That job is left for ceiling and number.

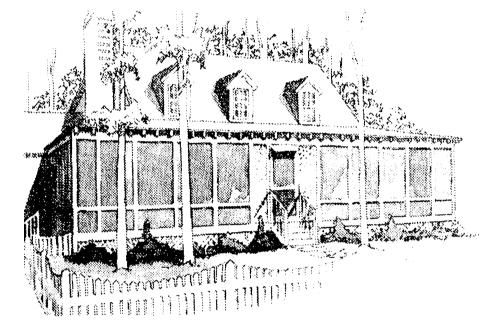

> Operate a whole-house fan only reduce the need for air-conditioning, when the temperature is lower outside won't want to turn one on during the

cost ten to 30 percent more than a cubic foot per minute (cfm) rating enough to make your skin feel cooler. oscillating fans.

Old-fashioned ceiling-mounted paddle fans produce cooling, comforting breezes and prevent air from stagnating. Most of these fans two important functions. First, it day, but come sundown, one of these are easy to install. Many are reversible, units begins to draw off daytime heat so the same fan that cools you in the summer can pull warm air down from

Here's an outdoor livingroom without the moths and mosquitos—a place where you can enjoy outdoor living in airy comfort.

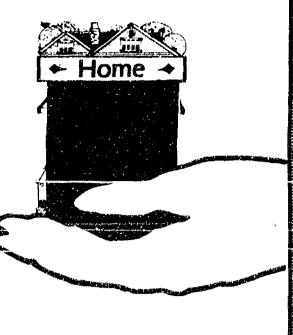

A traditional screen-enclosed porch offers a pleasant spot for entertaining, enjoying an outdoor breakfast, or just plain relaxing.

New mortgages make buying, remodeling affordable By Thomas Baese, president of

Tri-Lakes Home Builders Association So, you're ready to purchase your

dream house. The only question is how to finance it. When people think of a mortgage the traditional answer is a 30-year-fixed-rate mortgage.

Life isn't so simple today. So many types of mortgages have flooded the market in recent years, that you may have trouble making sense of all the acronyms. After hearing ARMs, SAMs, GPMs, VAs, and FHAs, you may want to scream "HELP" (which might be inappropriate, because there is a mortgage known as the "Home Equity Loan Program").

Before we examine some of these different types of mortgages, let's take a look at the most popular financing methods for most home buyers fixed rate mortgages and adjustable rate mortgages (ARMs).

30-Year Fixed-Rate Mortgage

The 30-year fixed-rate mortgage is the most popular financing instrument because it offers a stable monthly payment and is easier for people to budget for. This stability may come with a price, however, since interest rates on these mortgages usually run higher than beginning rates on adjustable loans. With a fixed-rate loan you are buying protection from future increases in interest rates — no matter how high rates go, your monthly payment will always be the same.

Another consideration is that the principal balance is reduce more gradually compared to loans with shorter terms, resulting in a slower buildup of equity.

15-Year Fixed-Rate Mortgage

A 15-year fixed-rate mortgage allows the home owner to pay off their entire mortgage in half the time and save a considerable amount in interest payments over the life of the loan. The tradeoff involved in paying off your loan quicker is incurring a higher monthly mortgage payment, which makes it more difficult to qualify for.

7-23 Loan

A "7-23" loan is a variation of a fixed-rate mortgage. The interest rate is fixed for the first seven years of the loan, and then the rate is adjusted to

reflect market conditions at that time. The main advantage of this type of loan is that home buyers often get a slightly lower than market rate to begin with. The main disadvantage is that buyers may see their interest rate go up as much as six points at the end of the seven-year period, depending upon

market conditions at that time. The lender may also have the option to call the loan due with 30 days notice at the end of year seven, making this loan similar to a "balloon" mortgage. If you know you will sell your home within seven years, this type of loan provides the advantage of a stable, slightly below market fixed-rate loan for a fixed period of time. Other which is the same as a 7-23 except the insurance premium. loan remains fixed for the first five years before changing.

Adjustable Rate Mortgage (ARM)

An ARM is a loan whose interest rate is adjusted according to movements in rates in the overall financial market. The adjustments are determined by movements in an index rate, such as the national average mortgage rate or the Treasury Bill

initial rates than fixed-rate loans. With an ARM, the consumer assumes part of the risk of an increase in interest rates, and so may receive a price break on the initial interest rate from the lender. You must consider whether a lower initial rate on the ARM is worth the uncertainty about possible future increases in your payments.

When shopping for an ARM, these are some of the questions to ask:

•What index will be used to adjust your mortgage rate? Try to obtain a table showing movements in the index over the previous ten years to see how your mortgage payments could change.

•How often will your mortgage be adjusted? One year? Three years? Five years? The longer the adjustment period, the better you will be able to plan your future household expenses.

rate is adjusted for the first time.

amount the lender adds to the index the original amount of your loan. rate to calculate your mortgage rate. your rate would be nine percent.

·What limits or caps have been of a sharp increase in your index rate. additional discount points to reduce you this figure.

FHA Loan

Covernment-backed mortgage insurance is available through Federal Housing Administration (FHA). Because the federal government is 2-1"buydown. The builder reduce the backing the loan, you may be able to buyers' rate three percent in the first obtain an FHA-insured mortgage with year, two percent in the second, and a downpayment of less than five one percent in the third. The buyers' amount you can borrow with an FHA- three years, avoiding "payment shock" insured loan. The limits vary in the fourth year when the buydown depending upon the price of housing expires. in the area. FHA-insured loans are variations may include a "5-25" loan, also pay more of an upfront mortgage provided separately by the builder, the

VA Guaranteed Loan

If you are a veteran, you may be able to obtain a loan insured by the Veterans Administration (VA). VA guaranteed loans require no downpayment and generally carry lower interest rates than conventional loans. You should apply to a local lending institution that will then submit your application to the appropriate VA office. Eligibility ARMs tend to be offered with lower requirements for veterans are determined by Congress. VA mortgages have no maximum loan amount, and lenders will typically make loans of up to \$184,000 without requiring a downpayment.

Graduated Payment Mortgage (GPM)

The GPM begins with lower payments that rise annually over the first five to ten years and then remain constant for the remainder of the loan. Unlike an ARM, a GPM is a fixedrate, fixed-schedule loan — even though the payments change, you always know exactly how they are going to change.

The lower initial payments enable you to qualify for a GPM with less income than you would need for a comparable level payment loan. With 30-year GPMs, early payments are •What is the initial mortgage rate? lower than the interest you owe to the Does it include a special discount? If lender, so negative amortization so, you could have a large increase in occurs. The payments level off at an your monthly payments when your amount higher than you would pay at the same point in a level payment loan, .What is the margin on your because you have to pay off the mortgage rate? The margin is the negative amortization in addition to

You should avoid GPMs if your For instance, if the index rate is seven house is expected to appreciate slowly percent and the margin is two percent, and you plan to sell it within a few

Buydown

placed on the adjustments? One of the A builder may provide a subsidy, or most important items to discuss with buydown, to reduce the interest rate your lender is the maximum amount on your mortgage. The buydown may that your mortgage rate can increase last a specified number of years or the both in any single adjustment period entire life of the loan. For example, if and over the life of the loan. Find out mortgage interest rates are nine your "worst case" situation in the event percent, a builder might pay a lender

the borrower's loan to a rate of only seven percent during the first year. making it easier for the buyer to qualify.

A popular type is the three-year "3percent. The government limits the payments rise gradually over the first

If the buydown lasts for only a available from most lenders. Due to limited period, find out how much FHA reform measures implemented your payments will increase when it is during the past two years, borrowers no longer in effect. Be especially are no longer allowed to finance 100 careful if the buydown is part of your percent of their closing costs, and must contract with the lender. If it is lender could hold you liable for the unsubsidized rate should the builder develop financial problems and not be able to pay the subsidy.

Balloon

With a balloon mortgage, the buyer makes equal fixed payments at a fixed interest rate for a short period, usually three to five years, and then must pay the entire remaining balance. A balloon mortgage may be worthwhile if you plan to sell your home within a few years and expect the value of your home to appreciate quickly. Even if you anticipate a fast turnover on your unit, you should look for an automatic refinancing clause that could save you from being forced to shop for another mortgage and pay closing costs again when the loan comes due.

The Right Choice

These loan types are some of the basic loans available today. There are other forms of creative financing available as well. There is no single "right choice" when it comes to mortgages. Deciding which kind of mortgage is right for you depends on your own individual circumstances. You must carefully examine your needs, goals and future financial prospects. Is the peace of mind from a fixed rate loan a better choice than an ARM which may start out at a lower rate, but is subject to rise in the future?

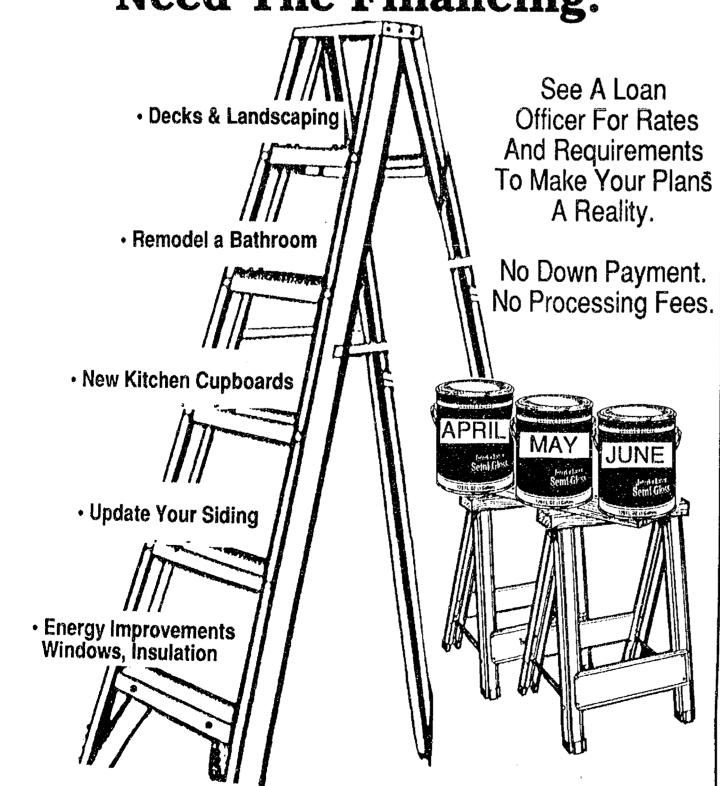

Shopping for amortgage is the same as shopping for a car or an appliance. Contact several lenders and compare their rates and check your local newspaper for rate surveys.

It is important to bear in mind that mortgage packages consist of much more than quoting interest rates. They consist of a quoted rate plus points, processing costs and other fees. A point is pre-paid interest assessed by the lender at settlement, with one point equal to one percent of the total loan

The costs added up together equal your true annual percentage rate (APR) spread out over the life of the loan. Lenders are required by law to give

SANDER

DRILL

Drywall sanding tips make job a little easier

Nobody ever claimed that sanding drywall joint and patching compounds was an enjoyable experience.

Most do-it-yourselfers k ow the process is a rather tedious and oftentimes messy chore. But there are a couple of ways to make the join title

One method is to try "wet" sanding. To wet sand, use a damp sponge instead of sandpaper to smooth the finish. A high density, small-celled polyurethane sponge moistened with lukewarm water works best. For touch-ups a smooth soft cloth will do.

Unlike dry sanding, wet sanding creates no dust. You won't need to wear a mask, use a dust collector and you won't have to clean up fine powder off the floor and near-by furnishings after the job is completed.

Additionally, wet sanding will not scuff or otherwise damage wallboard face paper, as sandpaper sometimes

Unfortunately, wet sanding is usually a bit more time-consuming than conventional sanding and is usually only practical for small repairs.

For larger repairs and for new wallboard installations, try using one of the new lightweight ready-mixed compounds.

Simple wallpapering gives room an entire new look

An easy way to give a room an entirely new look is to add wallpaper. "Installing wallpaper is not as difficult as you think. Once you establish your own style of hanging, it gets easier and easier," said Stephanie Wray, a design center specialist at The Home Depot.

First check the condition of walls to determine if you can paper over existing paint or covering, or if you need to remove or prime before you begin.

Clean painted surfaces with a solution of bleach and water then prime wall with wallpaper primer before hanging new paper. The importance of primer is two-fold: wallpaper adheres better when placed over primer, and if you choose to hang new paper later, the primer also makes it much simpler to remove the old.

Plaster walls, as found in homes constructed 30 years ago (most newer homes have wallboard), present a special problem. If you do have plaster. you will find it's a temperamental material and when subjected to the stress of removing old wallpaper or paint. may crumble and fall away from the wall leaving gaping holes. If possible, choose to sand and prime instead of removing old paper.

After cleaning and priming, gather tools such as a wallpaper brush, bin for water, several dropcloths and towels, wallpaper, level or plumb line, pencil, pallet or putty knife, razor knife, straight edge and a ladder and step stool.

To determine the number of rolls needed, measure the height and width of the area, multiply these two figures then divide by the square footage listed on the roll. This number will be the number of double rolls needed for that wall. And make sure to carefully check those seemingly low prices for rolls. When comparing prices, be sure to note whether the price is for a double or single roll of paper.

When buying paper, ensure that all rolls purchased have the same lot or run number. Rolls purchased from a different color lot or run may not match exactly.

Pre-pasted vinyl is the easiest wallpaper to work with. But if you choose to use paper without glue, simply roll out the paper on a dropcloth and spread glue with a wallpaper glue brush.

Measure paper on the wall, not the floor. Unroll against the wall, hold putty knife against the wall and paper. Cut above the putty knife leaving 3 or 4 inches of wallpaper at both the top and bottom.

After cutting, roll the sheet paste side out and place in water bin. Slowly unroll the paper through the water ensuring that all areas are damp. Fold one end toward the middle of the sheet so that the paste sides are touching. Fold the other end toward the middle also—this process is called booking. And it's important to lightly fold so a crease is not visible in the paper. Now allow the paper to expand and sit the stated amount of time on the roll so the paste becomes sticky. This could vary from 30 seconds to five minutes depending on manufacturer instructions.

After waiting a few minutes, it's time to hang the first piece. Start in the center of the wall, leaving the bottom part folded and stick the top section to the wall. Brush from the inside out to smooth paste, then unfold the bottom and brush smooth.

Lightly run the wallpaper smoothing brush across the paper before cutting, to ensure all air bubbles have been smoothed, remembering to pay special attention to the seams. Use a straight edge as a guide when cutting along the top and bottom.

Follow the same process for subsequent sheets, making sure to butt the edges of wallpaper together without overlapping. A note of warning: if patterns have to be matched, there will be some loss of paper depending on the size of the pattern repetition.

The most important thing to remember when matching seams is not to stretch the paper to make them meet. If the glue is of the right consistency, the wallpaper will side easily making the patterns much easier to match. Stretched wallpaper may shrink when dry and leave gaps. After each sheet is hung, sponge and wash excess glue, especially if the glue has made contact with any woodwork or

When papering near outlets, allow the paper to cover the outlet until most of the sheet has been smoothed. Paper around the outlet by cutting from the center of the outlet and working outward. Leave a little extra to tuck about a quarter of an inch under the switchplate.

When working into a corner, fold the paper into the corner and smooth. Make a plumb line on the new wall close enough to overlap the second sheet, then cut a straight line through both sheets. After removing excess, the sheets will easily butt together.

The little house that could pay for school build a pool finance a trip buy a ship stake a career help someone dear or simply spread a little cheer!

Use The Equity In Your Home To Write Yourself A Loan!

If you've built up equity in your home, our Golden Credit Line can help you put it to use.

Once you've established a Golden Credit Line, you have a ready line of credit up to 80% of the value of your home, less your current mortgage balance.

Golden Credit Line is an excellent way to provide yourself with a line of credit, enjoy potential tax benefits, and avoid paying loan fees. But only if you apply before March 31, 1993. Stop in at a GSB office, or call 348-7631 in Grayling or 732-8900 in Gaylord.

*Appraisal and recording fees totaling \$142 are waived. Normal title insurance fees for Golden Credit Line ranging from \$120 to \$400 is waived on all applications taken on or before March 31, 1993. The Annual Percentage Rate on a Golden Credit Line is 2% over the highest prime rate published in the Wall Street Journal during the month. Annual Percentage Rate (APR) example: if during the month the highest prime rate published in the Wall Street Journal is 6.50%, the interest rate applied to your Golden Credit Line would be 8.50% APT. Should the prime rate change, your interest rate will be adjusted at the beginning of the following month. The maximum interest rate will not exceed 18% APR.
